## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-27, 55-69, and 70 (a computer-readable medium version), drawn to methods for a pull installation requested from a client, classified in class 717, subclass 172 or 177.
  - II. Claims 28-54 and 70-72, drawn to methods for push installation from a server to a client without client requests, classified in class 717, subclass 172 or 177.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are disclosed as different combinations which are not related in design, operation or effect. These combinations are independent if it can be shown that (1) they are not disclosed as capable or use together, (2) they have different modes of operation, (3) they have different functions, or (4) they have different effects. (MPEP 806.04, MPEP 808.01).

In the instant case, Invention I is directed to a pull installation by selection of client units on which to install driver information by a selection indicating means while Group II is directed to a transaction by a push that is initiated on the server side without a user request for a setup instruction by such a selecting means.

These inventions are distinct for the reasons given above.

Art Unit: 2193

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
